

ACC-49 Instruction

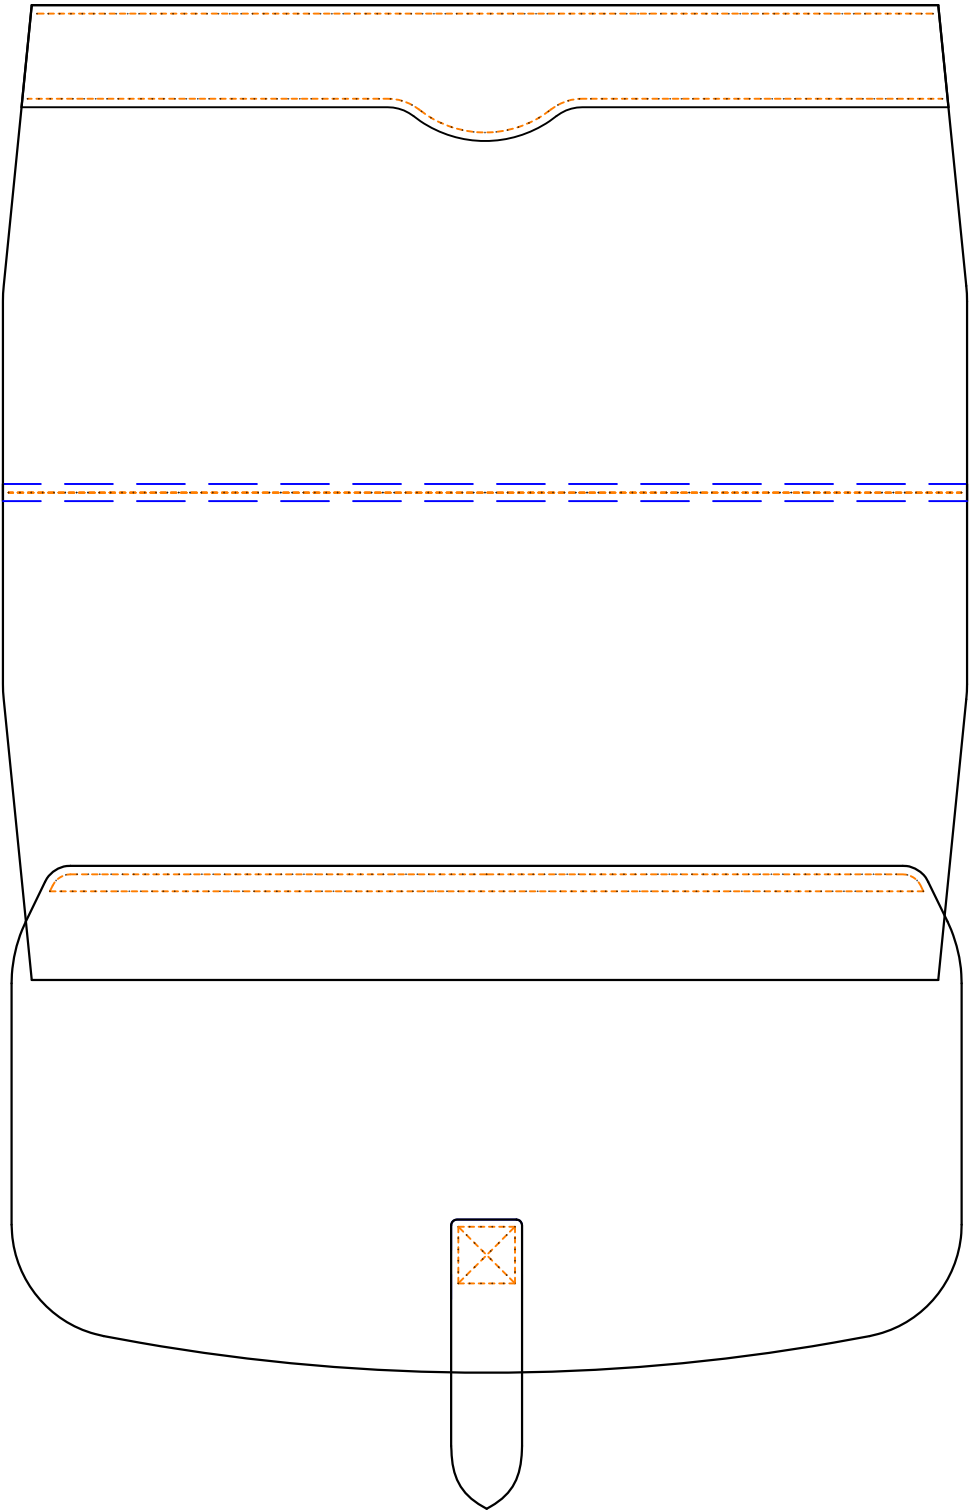

Step 1: Stitch A01 and A02 together to form the bag body

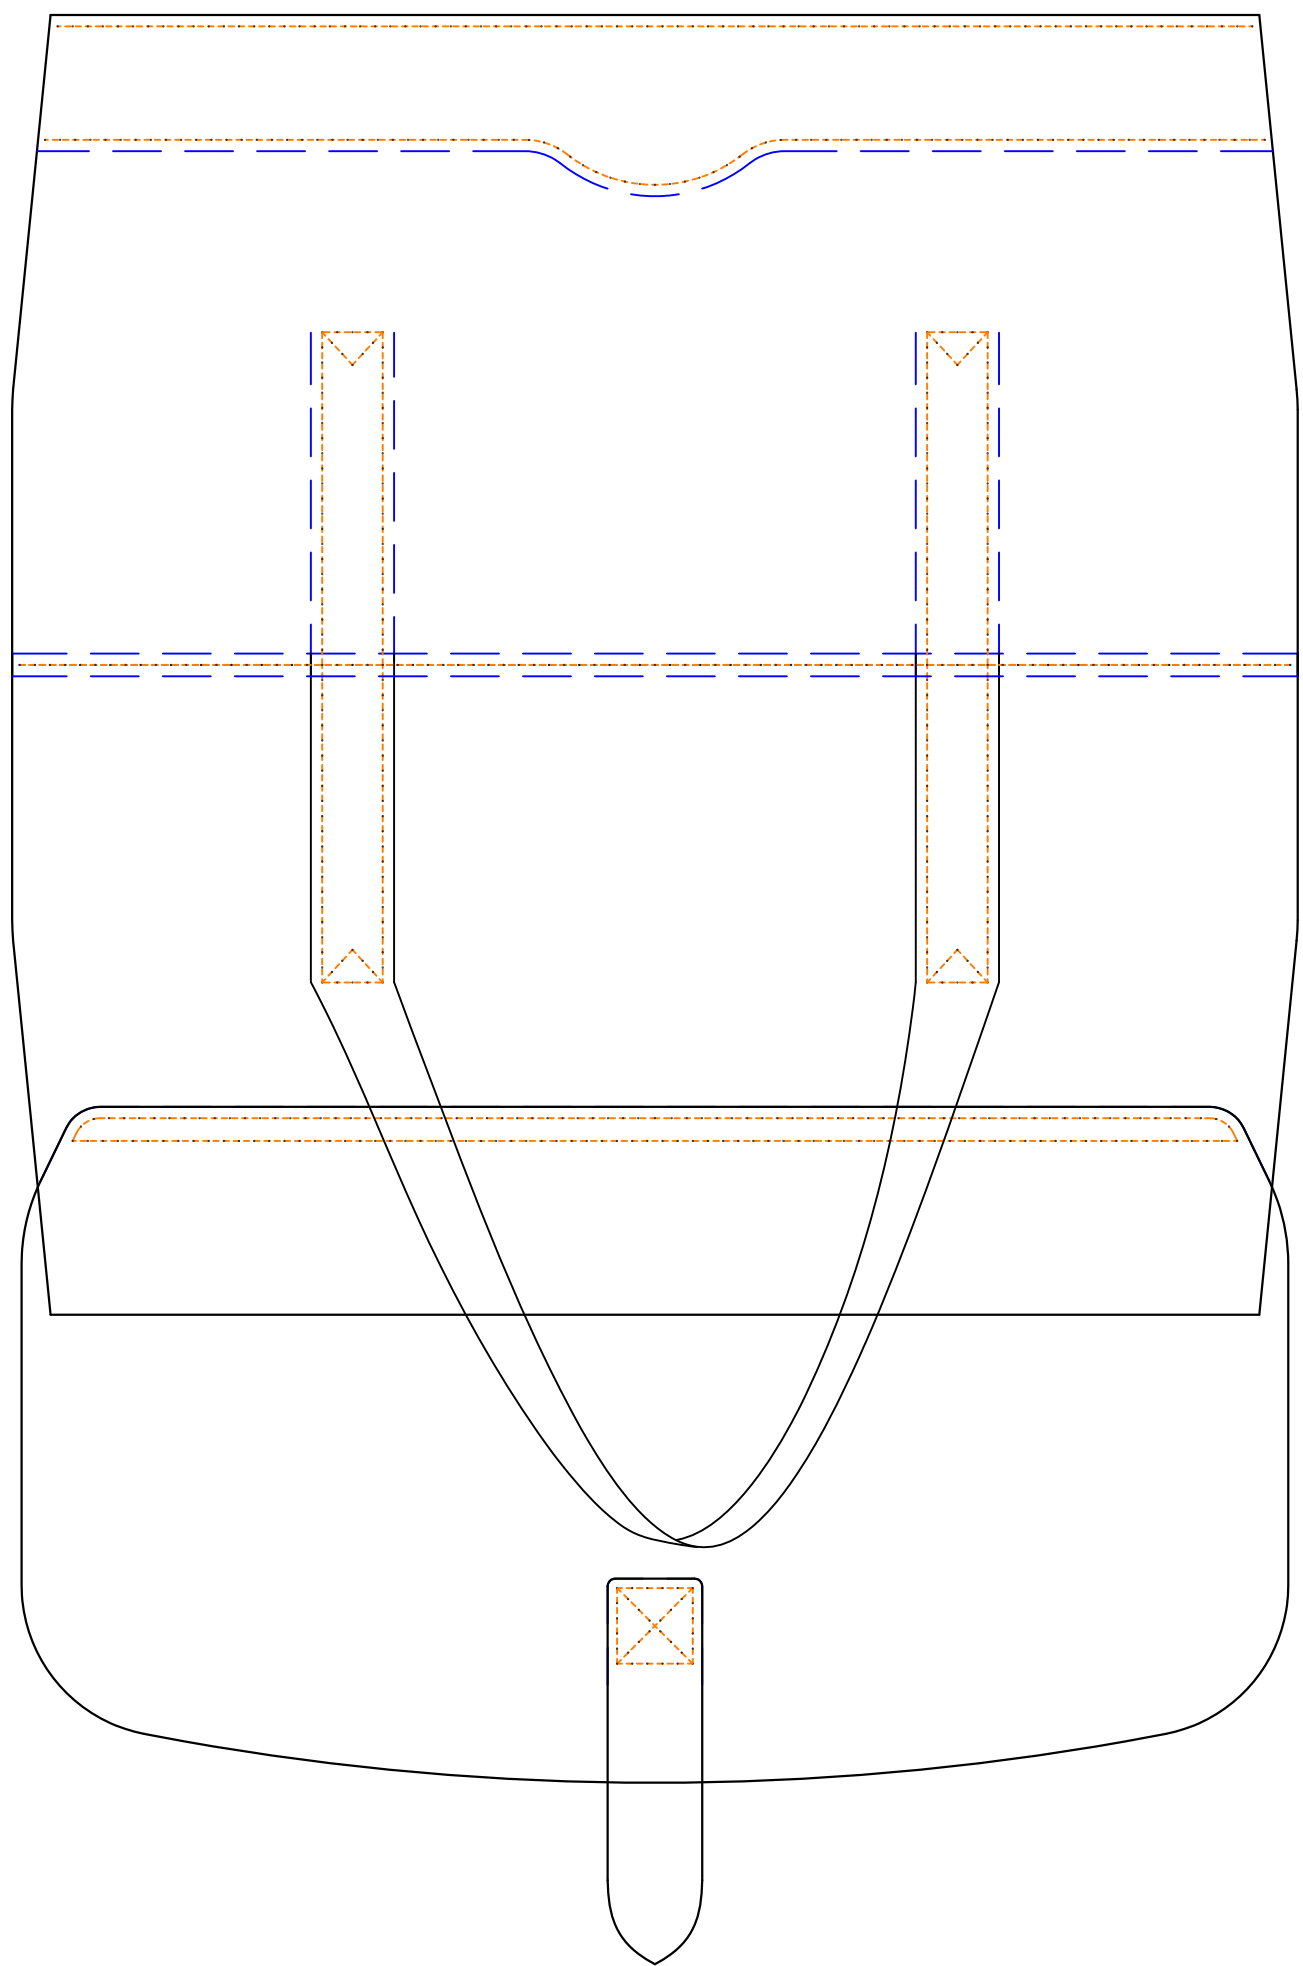

Step 2: Stitch A07 on A04 and then stitch on A02 according the orienting line

Step 3: Stitch A05 on A01 according to the orienting line

Step 4: Curve A06 and stitch it on A01 according to the orienting line, do the same as the other piece.

Step 5: Now you can glue 2 pieces of A03 (gusset) on according to the orienting points (red short lines) and stitch a whole bag. After you finish it, then try to install A08 and find the right place for the magnetic button, please adjust the place of the magnetic button along the green line according to your needs.

I advise you stitch A08 finally, although it is a little trouble when you stitch it, but that will help you to find a perfect place for the magnetic button.
